Jeopardy Game Show

Standard: 9.3 Apply graphical and multimedia elements to presentation by manipulating graphical elements, images, clip art, shapes, WordArt, SmartArt, and editing video and audio content.

Objective: You will be creating your own Jeopardy-style game show about a topic of your choice. The slides are mostly set up. In order to complete the game, you will be working with PowerPoint text boxes, WordArt, hyperlinks, and Action Buttons. Text Boxes PowerPoint layouts often contain text box placeholders. However, you may want to add your own. A text box allows you to create and place text wherever you want. Text boxes can be added from the Insert tab. Word Art WordArt is a combination of text and graphics. WordArt makes a big impact and really catches the eye of your viewers. You can use WordArt for any text, but for this project we will use it for the titles.

- Use text boxes
- Use WordArt
